

C\_both:  $R = |\text{residual}| / |\text{d\_RT}|$  vs tangent space  
(red = (0.01, 0.1, 0.01); absent where underdetermined)

C\_both:  $\chi^2_{\text{res}} / \text{dof}$  vs tangent space  
(red = (0.01, 0.1, 0.01); absent where underdetermined)

nuisance amplitudes the fits demand (determined points)
